

Kollin K. Labowski

 kkl0009 |  KollinLabowski |  klabowski@ufl.edu |  571-287-1234

SUMMARY

Ph.D. student at the Florida Institute of Cybersecurity (UF) focused on hardware security, cryptography, and formal methods, with a passion for turning theory into practical solutions—from secure IP protection to zero-knowledge VMs. Seeking a summer 2026 internship to further grow as a security researcher.

Personal website: <https://cise.ufl.edu/~klabowski>

EDUCATION

2023–2027 Ph.D. in Computer Science, **University of Florida** (GPA: 4.0/4.0)
M.S. in Computer Science (expected 2026) — Certificate in Information Security

2019–2022 B.S. in Computer Science, **West Virginia University** (GPA: 4.0/4.0)
Minor in Mathematics — Concentration in Cybersecurity

PUBLICATIONS

Animesh Chhotaray, Kollin Labowski and Thomas Shrimpton (Oct. 2025). “Bad Benchmarks and a Fourier-Analytic Framework for Characterizing the (Un)Hideability of Combinational-Logic Circuits.” (In submission.) * **Bold** = Shared first author

WORK EXPERIENCE

Research assistant (Florida Institute of Cybersecurity @ UF) August 2023 - present

- Research in applying cryptographic-style proofs to logic locking for protecting integrated circuit IP, and identifying weaknesses in existing benchmarks using Boolean Fourier analysis (supported by NSF)
- Work in applying zero-knowledge virtual machines and side-channel emissions to efficiently validate the execution of trusted programs on untrusted hardware (supported by DARPA)
- Lead TA in group of 15 TAs for databases course with over 600 undergraduate students

Software Engineer II (Augustine Consulting, Inc.) Oct 2022 - Jul 2023

- Developed and maintained multiple Android applications and plugins for soldier communication and navigation as part of the Nett Warrior project (PEO Soldier; see ATAK)
- Designed an automated, multithreaded Python script for provisioning mobile devices
- Collaborated with a small team of 6-8 developers and testers using Agile methodologies

Intern (Stephenson Stellar Corporation) Jun 2021 - Aug 2022

- Conducted thorough security and validation testing of 5G user equipment using Keysight UXM in support of the Air Force Research Laboratory

PROJECTS

See: <https://cise.ufl.edu/~klabowski/projects.html> for documentation/code for 20+ projects, including:

- Malware analysis reports
- “Smart pantry” mobile application
- CLI operating system in C

SELECTED SKILLS

Programming: Expert (with 10 years experience) in Java, Python, C, C++, C#, Git

Cybersecurity: Ghidra/IDA, x64dbg, Metasploit, Wireshark, Kali Linux, Nmap, penetration testing

Hardware: ISAs (x86/RISC-V), Boolean circuits, HDL (VHDL/Verilog), IP protection

Mathematics: Cryptographic proofs, Boolean functions, linear algebra, zero-knowledge proofs

Web Dev: HTML/CSS, JavaScript, PHP, React, Android Studio, MySQL, Amazon Web Services
